

## problem installing AGWA2

Posted by agfe - 2008/06/10 07:26

---

Hi,

I am working in Window XP operating system. ArcGIS 9.1 along with SP2 and dotnet framework 1.1 installed in my computer. But when I am trying to install the AGWA 2.0, installation get interrupted with following message repeatedly

" Unable to get the installer type in the c:\program files\susda-ara swrcagwa2\agwa2 dektop.dll assembly.->One or more of the types in the assesmbly unable to load."

Could anyone help me in installing AGWA 2.

Thanks to all respondants.

Hi Arvind,

Sorry it took me a while to get back to you. Anyway, did you read this thread?

I think it pretty well covers the problems. Sounds like you don't have .NET Support installed for your ArcGIS installation (look at the message with the screenshot).

Hallo Arvind, I'm student from Malaysia. I also have same problem, but cannot solve. How you solve that problem? May be you have file "agwa2 desktop.dll" for installation AGWA2.  
Please help me.
